

# Open Text® Exceed 3D™ 14

Reduce ownership and cost per seat by leveraging OpenGL® API through Exceed 3D

Exceed 3D™ adds the advanced graphical computing power of OpenGL® API—the industry standard three-dimensional visual interface—to Exceed®. By leveraging the accelerated power of Windows®-based PCs, Exceed 3D distributes high-end engineering and finite analysis applications based on OpenGL API to lower-cost desktops, thereby reducing ownership and cost per seat.

## Take advantage of your PC desktop

Not all X applications are created equal. Some X applications require more than just a simple X server to display—they need an X server with 3D capabilities! CAD/CAM/CAE, medical, and seismic applications are just some of the many types of applications that can take advantage of the OpenGL API support provided by Exceed 3D and display complicated three-dimensional drawings on users, PC desktops. Exceed 3D is an add-on product for Exceed.

### Key features

- Add-on Product to Exceed 14
- Support for X11R7.4
- Native 64-bit support for Microsoft Windows x64 family and Windows 7
- Support for GLX 1.4
- 3D Overlay support
- Multi-language support
- Direct Rendering support
- Support OpenGL 1.4 extensions in device drivers

### System requirements

**Operating systems:** Windows 7, Windows Vista, Windows XP SP2, Windows Server® 2008, Windows Server® 2003, Windows Terminal Server Edition, Citrix® XenApp™ for Windows platforms

### System requirements

- Hard Drive space for typical installation: 7 MB
- Minimum CPU requirements: Pentium 4
- Exceed must be installed on the system
